**Reflection of the week** : Week 02

---

### What did I learn this week?

This week, I gained further practical experience in teaching grammar, revising lessons, and assessing students' progress. I taught pronouns, adjectives, adverbs, prepositions, and conjunctions with their types and examples. Along with grammar, I continued regular passage-reading and vocabulary practice to improve students' pronunciation, fluency, comprehension, and word knowledge. The Sindh University entry-test students separately practised past-paper MCQs, and by the end of the week we had reviewed past papers from 2013 to 2022. Before the weekly assessment, I repeated the main grammar lectures so that students could revise the concepts they had learned during the week. On the weekly test day, I conducted two separate tests: one for grammar and one for Sindh University entry-test preparation. The students performed well overall. I checked each student's paper individually, discussed their mistakes, answered their queries, and guided them on areas that required improvement. In the Sindh University practice test, students scored between 55 and 75 marks. This experience taught me that regular revision, testing, and individual feedback are important for identifying learning gaps and helping students improve with greater confidence.

### What can I do differently next week?

Next week, I will give more time and focused practice to the Sindh University entry-test students, especially through past-paper MCQs, revision, and discussion of common mistakes. At the same time, the regular Basic English Grammar course will continue with grammar lessons, passage reading, vocabulary practice, and weekly assessment. I will continue checking students individually and provide clearer guidance where repeated errors appear. A University of Sindh entry-test assessment is planned for 04 October 2026. After the test, I will record the students' scores in detail, review their performance, and use the results to plan further practice according to their strengths and weaknesses.
